

**AMENDMENTS TO THE SPECIFICATION:**

**In the clean copy of the substitute specification filed as Appendix A on June 10, 2005, please replace the paragraph beginning at page 26, line 20, with the following rewritten paragraph:**

A filter information source 521 may enable component 520 to select and instantiate the specific filters needed for a code generation task. Filter information source 521 may include a lookup table 523 of information, for example, information relating to configurations data and individual functionalities of a plurality of filters.
